

“As a practitioner interested in being current & progressive, I always enjoy & appreciate CE I can take back to the ‘real world’ and implement immediately.

Your course was organized, well presented and very ‘user friendly’. In the car on the way home I had already organized it in my mind, and started implementing it at the next emergency shift. I also recommend it to my Emergency & ‘day practice’ colleagues. It was great!”

Dr. Mary Sue McGovern, DVM
Animal Emergency Clinic 610,
Houston, Texas

“FAST has made the use of ultrasonography more accessible & less intimidating to our ER vets, and it’s standardized approach makes transferring of cases between clinicians seamless and universal. In short, we could never go back to a “pre-FAST” way of practicing medicine.”

Dr. Joanne Fanou, DVM CCRP,
Practice Manager, 404 Veterinary Emergency &
Referral Hospital Newmarket, Ontario, Canada

“That was a great talk! I think it was the finest lecture pertaining to POC (point-of-care) ultrasound that I’ve ever heard.

Thanks again for your time, effort, and expertise. Will look forward to collaborating with you on future endeavors!”

Steven G. Venticinque, MD
Professor of Clinical Anesthesiology & Surgery
Program Director Anesthesiology Critical Care
Fellowship Director, TISAT Care Consortium Director,
Audi L. Murphy VA Surgical ICU Department of Anesthesiology University of Texas

FASTvet™ Ultrasound Training *Fast Saves Lives™!*
